

Has your fixed asset solution reached the end of its useful life?

Now is the time for the tool of the future.

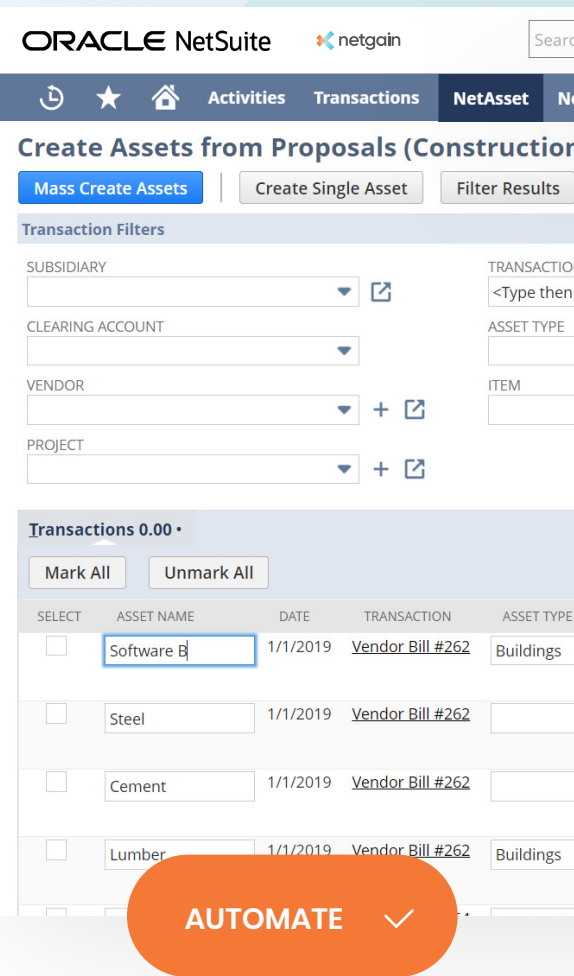

NetAsset is Netgain's Advanced Fixed Asset Management tool that enables your business to operationalize accounting, maintenance, insurance and claims, tracking and reporting throughout all aspects of the fixed asset lifecycle.

Key NetAsset capabilities

- Construction in Progress (CIP) build-up
- Proper segregation of duties across AP, fixed asset, accounting and facilities teams
- Advanced reporting including fixed asset roll-forwards and waterfall reports
- Direct connection to vendor bills and projects
- Comprehensive physical asset tracking
- Intercompany asset transfers and eliminations
- Asset build-ups, splits, revaluations and disposals
- Advanced alternative depreciation schedules and multi-book enabled
- Bulk processing
- Proactive and ad-hoc fixed asset maintenance

A native SuiteApp provides superior benefits

- 100% drill-down capability
- Direct links to the asset throughout NetSuite:
 - Purchase requests, orders, vendor bills, invoices & journals
 - Scheduling & tracking of maintenance, claims & usage
- Capture financial & non-financial data
- Everything in a unified system
- Zero integrations or outside systems

Full support throughout the asset lifecycle

1
